Dev	velopment ir	formation					
A.	<b>Objectives:</b> What are we trying to achieve by building this Web site? How many visitors do we want in a given time frame? What do we want them to do when they visit our site?						
В.	Target audien	<b>ce:</b> Who is our	target auc	lience for the site?			

<b>Current target audience perceptions:</b> How does the target audience perceive our company, our products, and our current Web site (if there is one)?					
<b>Net impression:</b> What is the most important impression that we want our Web site to make on or target audience?					
Key copy points: What do we need to tell our target audience?					
Proof points: Why should our target audience believe us?					
<b>Tone:</b> In what manner should we speak to our target audience? That is, should we use technical language; marketing hype; standard, straightforward English; or a combination of these tones?					
Information buckets: What information categories must we provide to meet our objectives? How do we want to organize our information into these categories?					

**I. Navigation:** How do customers want to navigate within our Web site? What search and browse mechanisms should we offer?

ur Web site?	t are the interrelationships among the pieces of information that we provide on
	ctionality: What features should we provide on the site to make it easy for our business with us (for example, shopping cart and payment options)?
evwords and	meta tags: What keywords will customers likely use to find our Web site?
